2. 시스템 테스트

1-1, 학식 시간은 조식, 중식, 석식 중 하나가 돼야 한다.

Times 함수를 실행시키고, ans 에 1 or 2 or 3 을 입력했을 때 return 이 1 or 2 or 3 으로 제대로 나오지 않으면 오류이다.

```
import unittest
     from choice import *
     class TddTest(unittest.TestCase) :
         def test_time(self):
            time = times()
             test_time = [1, 2, 3]

             if time not in test time:

                 print("time=",time)
13
                 print("Time should return 1, 2, 3 but it doesn't")

             else:
